

Purissima Pipeline

Can You Believe This Weather?!

What an amazingly mild summer we've been experiencing! This should translate into less irrigation, less water usage and smaller water bills compared to last summer! If this is not you, contact Alexis Shields, the Water Conservation Specialist at ashields@purissimawater.org or 650/948-1217 for assistance.

Last Month's Questionnaire Results:

Last month we asked: what different subjects you would be interested in for future seminars? The topic that garnered the most responses was meadow lawns! We will let you know when the meadow lawn seminar is scheduled.

Many thanks to each and every one of you who participated in the questionnaire; we really appreciate your feedback!

Have You Checked Your Irrigation Lately?

A leak could be the cause of an unusually high water bill. You can help lower your bill and save water by making sure your irrigation system is functioning properly. Consult with your landscaper or contact Alexis Shields, the District's Water Conservation Specialist, at 650/948-1217, or by email at ashields@purissimawater.org for assistance.

Maintenance Around the Meters

Please maintain the landscape around your meter. Shrubs and trees may cover the meter, making it difficult for us to read or check your meter for leaks.
