On June 10, 2015 the Board voted to raise rates for increased costs of water supply purchased from the San Francisco Public Utility Commission (SFPUC) and to keep rates aligned with the cost of providing service. The SFPUC doubled its wholesale water rates over the past 5 years and will raise wholesale rates by an additional 28% starting July 1, 2015. For the past three years, The District deferred rate increases despite higher wholesale prices because of our cost cutting measures such as reducing operating costs, and partnering with the Los Altos Hills County Fire District on capital projects. The new rates will support financial stability during drought and reduced water sales.
